Online Number Theory Seminar

28 February 2025. – 17:00-17:50

H. Brunotte: A review of my results in algebraic number theory

The main algebraic number theoretic results of the author (most of them in cooperation with other mathematicians) are presented. These results concern some constants and units in algebraic number fields, Perron, Salem and Garsia numbers, a particular family of integer sequences and canonical number systems.
